

AMENDED CLAIMS IN CLEAN FORM

*B*  
*A*  
*A* ✓  
1. (amended) An image scanner, comprising:

at least two lenses, wherein optical axes for the lenses are not coincident; and  
at least one reflecting surface, wherein light, from a scanline on a surface being  
scanned, is directed by the reflecting surface through the lenses; and  
wherein light, through the lenses, from the scanline, originates from a video display.

8. (amended) The image scanner of claim 1, wherein the reflecting surface can be reoriented  
to direct light from the video display, through the lenses, instead of light from the scanline  
being directed through the lenses.

AMENDED CLAIMS WITH CHANGE MARKERS

1. (amended) An image scanner, comprising:

at least two lenses, wherein optical axes for the lenses are not coincident; and  
at least one reflecting surface, wherein light, from a scanline on a surface being  
scanned, is directed by the reflecting surface through the lenses; and  
wherein light, through the lenses, from the scanline, originates from a video display.

8. (amended) The image scanner of claim [7] 1, wherein the reflecting surface can be  
reoriented to direct light from the video display, through the lenses, instead of light from the  
scanline being directed through the lenses.
